## Maru Methodology Statement

This Maru Public Opinion survey conducted on behalf of North Strategic was undertaken by the sample and data collection experts at Maru/Blue. 1,518 randomly selected Canadian adults who are Maru Voice Canada online panelists were surveyed from September 15th to September 16th 2022. The results of this study have been weighted by education, age, gender and region (and in Quebec, language) to match the population, according to Census data. This is to ensure the sample is representative of the entire adult population of Canada. For comparison purposes, a probability sample of this size that is comprised of full-time employed respondents used in this study has an estimated margin of error (which measures sampling variability) of +/- 3.0%, 19 times out of 20. Discrepancies in or between totals when compared to the data tables are due to rounding.
